RE: Powell Road Landfill

Dear Ms. Clark:

I am in receipt of your letter dated July 8, 1993. You state that our response to question 5b was deficient because we did not provide information regarding the sites, if any, to which we were sending our waste.

Question 5b specifically asks what care we exercised with respect to material that may have contained hazardous substances sent to Powell Road. DAP's response stated that to the best information of DAP, no material containing hazardous substances was sent to Powell Road. DAP has no additional information which would cause it to change that position.

Since DAP maintains that no material containing hazardous substances was sent to Powell Road, I do not see how your recent request, dated July 8, 1993, is relevant to the investigation of the Powell Road landfill. Aside from the relevancy issue, DAP previously provided you with copies of documents obtained from waste haulers by attaching them to the response filed May 1, 1990.

If you now have information which shows that DAP did send material containing hazardous substances to Powell Road, then please consider this letter to be a request for that information pursuant to F.O.I.A.

Thank you.

Very truly yours,

Carla M. Frame
